Welcome to attend ICSIM2022! *2022 The 5th International Conference on Software Engineering and Information Management* will still be held in Yokohama, Japan on January 21-23, 2022. ICSIM2022 will be co-sponsored by Institute of mobility culture research center of Keio university as well as Cross-ministerial Strategic Innovation Promotion Program(SIP). Many international universities such as University of Sydney, University of Newcastle Australia, University of Science and Technology of China, etc will offer the continuous technical support for ICSIM2022.

### Publication

The accepted ones will be collected in the conference proceedings to be published with International Conference Proceedings by ACM (ISBN: 978-1-4503-9551-9), which indexed in Ei Compendex, Scopus, etc. The first four years’ conference proceedings (2018–2021) were published online and indexed by EI and Scopus within 4 months after the conference.

### Organizing Committee

**Conference Chairs**

Hiroaki Nishi, Keio University, Japan  
Yonghui Li, IEEE Fellow, University of Sydney, Australia

**Program Chairs**

T.Ohtsuki, Keio University, Japan  
Koichi Asatani, Kogakuin University, Japan

**Program Co-chairs**

Ke Qin, University of Science and Technology of China, China  
Suhuai Luo, University of Newcastle Australia, Australia  
Yamaki Hayato, The University of Electro-Communications, Japan  
Matsui Kanae, Tokyo Denki University, Japan

**Local Chair**

Kubo Ryogo, Keio University, Japan

**Co-Sponsors**

Institute of mobility culture research center of Keio university as well as Cross-ministerial Strategic Innovation Promotion Program(SIP)

### TOPICS

#### Software Engineering

- Software Agent Technology  
- Middleware Design Techniques  
- Reliability & Modeling Analysis  
- e-Government Engineering  
- Modeling with UML  
- Cost Modeling and Analysis  
- Component-Based Software Engineering  
- Mobile/Wireless Computing  
- Computer & Software Engineering  
- Communication Systems and Networks

#### Information Management

- Business strategy and information systems  
- Management Information Systems  
- Information systems planning and management  
- Adoption of information technology in organizations  
- Human factors in information systems  
- Knowledge acquisition, expert systems  
- Systems analysis and design methods  
- Object-oriented enterprise modeling

The above topics are just part of scopes. For more information, you can check the official website!
